PROJECTS

Tweeter — Twitter Clone | Python Stack

github.com/parwalr/Tweeter

Twitter clone that allows users to post tweets, follow other users, retweet tweets from other users, generate hashtags, as well as like and comment on tweets. Technologies used:

- Back end written in Python using the Django framework
- Registration and Login implemented both front end and back-end validations and bcrypt
- MySQL used as database to store user information.
- Front end developed using HTML5, CSS3, Bootstrap, JQuery, and AJAX

Ecommerce Website— Etsy Clone | Java Stack

github.com/parwalr/Etsy_Clone

Ecommerce site that allows users to create individual “shops” and add products to their shops. Users can shop for products or search for products based on categories, place orders, as well as view past orders. Technologies used:

- Java using the Spring framework and MySQL as the database to develop the backend
- HTML5, CSS3, Bootstrap, JavaScript implemented on the front end

Notes App | React Native

https://github.com/parwalr/Notes_App

A mobile application that allows users to create notes on their phone. The application implements full Create, Read, Update, and Delete (CRUD) Routing. Technologies used:

- React Native to build a mobile application with Context and React Navigation
- Uses a JSON API server and Ngrok to store the information.
- HTML5, CSS3, JavaScript implemented on the front end

TECHNICAL SKILLS

Languages

Java
Python
JavaScript
HTML5
CSS3 | SASS | LESS
TypeScript
SQL

Frameworks

Express
Django
Flask
Spring
Angular
React Native

Libraries

Node.js
React | Redux
Mongoose
Bootstrap
JQuery
AJAX

Databases/Services

MySQL
SQLite
MongoDB
Firebase
REST
AWS

Yelp Search App | React Native

https://github.com/parwalr/Yelp_Search_App

Phone app that allows users to search for particular restaurants or a type of cuisine and orders them by price range. The user can scroll through the different restaurant options and click on one to see specific details about the restaurant. Technologies used:

- React Native to build a mobile application and the Yelp Fusion API to fetch the restaurant information
- HTML5, CSS3, JavaScript implemented on the front end

Squishy Tomatoes — Rotten Tomatoes Clone | Mean Stack

github.com/parwalr/Squishy-Tomatoes

Users can upload movies as well as see all the other movies that have been uploaded and write reviews for movies and see reviews left by other users as well. Implements full Create, Read, Update, and Delete (CRUD) Routing. Technologies Used:

- Angular framework used for the interface to allow for a single page application
- Front end styling done with CSS and Bootstrap
- MongoDB as database
- Node and Express used for JavaScript libraries

SOFT SKILLS

Collaborative
Adaptable
Time Management
Interpersonal Communication

PREVIOUS EXPERIENCE

Coding Dojo Bootcamp, San Jose

MAY 2019 - AUGUST 2019

Full-stack web development coding bootcamp. Built full stack applications across three different languages that included python, java, and javascript.

Rose Garden Smiles, San Jose — Dental Assistant

SEPTEMBER 2018 - MARCH 2019

Performed a variety of patient care, office, and laboratory duties as well as worked chair-side while the dentist examined and treated patients. Helped prepare dental instruments and patients for treatment.

De Anza College — Teacher Assistant

MARCH 2016 - JUNE 2016

Assisted professor during laboratory component of Ecology and Evolution course. Explained biological concepts to students in an intermediate level course. Evaluated homework, tests, and laboratory experiments.

EDUCATION

Coding Dojo, San Jose - *Development Bootcamp*

Certificate of Completion, 3 Full-stacks (Python, Java, Mean) MAY 2019 - AUGUST 2019

University of California, Los Angeles — *Biology B.S.*

SEPTEMBER 2016 - SEPTEMBER 2018

De Anza College, Cupertino

SEPTEMBER 2014 - AUGUST 2016
